

Hello,

My name is Felix Guzman, I am writing as I would like to formally re-introduce myself to the National Tourette Syndrome Association. I along with Donald Donin and three of my former Kingsborough Community College classmates; Irina Sivitskaya, Brian Hart, and Eric Uchitel; attended the 2011 TSA conference where we presented the winning TSA NYC chapter website assigned for our required academic Service Learning Project.

As your organization might be well aware, Donald Donin has recently passed away. It is with my sincerest hope that I can help do what I can to nurture his legacy. Donald was an amazing individual. My mentor, dear friend and constant source of encouragement. His perseverance despite the odds, and his unwavering belief in seeing the potential in others, is a story worth revisiting. I should think that his death will amount a loss of immeasurable proportions to the TS-affected community. The consummate professional: brilliant, considerate and nurturing. His will to make a difference, willed others to find themselves. Civic duty dictates it is necessary to bring about the impetus for change to allow others to live more productively.

With that having been said, if there should be a need for assistance in any manner in the matters of coordination/facilitation of administrative tasks and/or media communications, please feel free to contact me.

I will gladly make the necessary accommodations, time permitting to offer my time and services to your organization.

Thank you on behalf of those your organization has touched directly, and indirectly such as myself.
